

I just started my new position as a Cardiovascular Sonographer at Munson Medical Center in Traverse City.

I am back and forth to Grand Rapids until the end of the semester as I am currently teaching Mondays and Fridays at Grand Valley State University in the Cardiovascular and General-Vascular programs.

Personally, I am married, Mike, my husband is retired and is wonderful support staff at home. I have 2 grown children, one in Ohio and the other in Spokane, WA.

I love all aspects of sonography, especially teaching, and could never any other occupation.
